■ Picture is only for reference

## **GETTING STARTED**

Plug the USB connector to the PC USB port and it will take about 1min to automatically install the driver.

Place the headset on your head and adjust the headband for a comfortable fit.

You can adjust the volume with:

1. The standard Windows audio controller
2. Any audio controller inside the software

Once an audio source is playing, set the volume to a suitable level.  
Prolonged listening at high volume may adversely affect your hearing.

## **SONAR TUNER**

Using SONAR TUNER software will enable the full feature set of SONAR-01 headset.

Please go to our website to download the SONAR TUNER.

You can use it to customize audio EQ settings to your favorite style.
